  - Central American Commission of Environment and Development (CCAD)
- National counterparts:
  - Ministries of Environment
  - National Commissions of Civil Protection
  - National Authorities of Meteorology and Water Resources

# Central America – *Euroclima+* project

## Results:

1. Governance instruments for flood and drought risk reduction and increase of resilience are created and improved
2. Extended technical capacities related to emergencies caused by drought or flood events in an integrated and inclusive approach
3. New information generated and training developed for drought and flood disaster risk knowledge and management
