

**Adapting to Climate Change:
Assessing the World Bank Group
Experience
Phase III**

Adapting to Climate Change: Assessing World Bank Group Experience

Phase III of the World Bank Group and Climate Change

Contents

GLOSSARY	VII
PREFACE	XI
ACKNOWLEDGMENTS	XIII
STATEMENT OF THE EXTERNAL ADVISORY PANEL	XV
OVERVIEW	XIX
MANAGEMENT RESPONSE	XXIX
CHAIRPERSON'S SUMMARY: COMMITTEE ON DEVELOPMENT EFFECTIVENESS (CODE)	XXXIX
1. CONTEXT AND APPROACH	1
Two Impacts of Climate Change	1
Adaptation to Climate Variability and Climate Change	4
Climate Change Makes Development More Costly and Complex	5
Evaluation Questions	6
Scope and Structure of Evaluation	7
Evaluation Approach	8
Portfolio Analysis	9
2. CLIMATE ADAPTATION AT THE WORLD BANK GROUP	11
Strategic Attention to Climate Adaptation at the World Bank Group	11
Monitoring Adaptation Efforts and Results	13
Tracking Projects with Climate Adaptation Benefits: Neither an Input, Nor an Output, Indicator	14
Toward an Improved Results Framework	16
Climate Risk Identification for Projects	18
Climate Risk Identification at the World Bank	18
Climate Risk Identification and Screening at IFC	19
IFC's Approach to Climate Risk Management in Current Practice	19
Country-Level Climate Adaptation	20
Country Assistance and Partnership Strategies	20
Development Policy Operations	22
Pilot Program for Climate Resilience	22
Case Studies: Supporting Adaptation at the National and Regional Level	23
Caribbean Adaptation Projects	23
Colombia	25
Kiribati	27

CONTENTS

Conclusions.....	29
3. DEALING WITH CLIMATE VARIABILITY	31
Agriculture and Droughts	31
Irrigated Systems: Irrigation, Efficiency, and River Basin Management	33
Rainfed Systems and the Drylands, with a Focus on Sub-Saharan Africa.....	36
Research, extension, and seed delivery	37
Watershed Management and Sustainable Land and Water Management Projects	37
Drought Relief and Management Projects	40
Crop and Livestock Insurance Schemes.....	42
Conclusions: Agriculture and Drought Mitigation	45
Disaster Risk Management: Floods and Storms.....	46
Disasters Are a Large and Growing Drag on Development.....	46
Management of Current Disaster Risks Contributes to Climate Adaptation	48
The Bank Has Shifted Its Emphasis from Disaster Relief to Disaster Risk Reduction and Mitigation	49
Flood Risk Reduction	49
Mangrove Conservation and Planting	51
Financial Risk Management.....	52
Conclusions on Disaster Risk Management.....	55
Hydromet Services.....	56
Context: Underinvestment, Underuse, and Uncaptured Benefits of Hydromet Systems.....	56
World Bank Experience.....	58
National-Level Projects.....	58
Projects in Africa, Past and Present.....	59
Dealing with Climate Variability: Conclusions	60
4. ANTICIPATORY ADAPTATION TO CLIMATE CHANGE	61
Normative Theory of Incorporating Climate Risk into Project Planning	62
Flexibility.....	62
Discounting.....	63
Uses and Limitations of Climate Models	64
Applications of Climate Models at the World Bank Group	67
Climate Change and Hydropower Investments.....	71
Normative Considerations	71
Analytic Studies	73
World Bank Group Practice in Incorporating Climate Change into the Design and Appraisal of Hydropower Facilities	73
Land Use and Climate Change Adaptation.....	76
Climate Change, Land use, and Biodiversity	76
Macrozoning of Rural Land Use.....	77
Exposure Reduction.....	78
Preparing for Long-Term Agroclimatic Transitions.....	80
Agricultural Research and Development, Including Conservation of Genetic Resources	82
Conclusions.....	83
5. CONCLUSIONS AND RECOMMENDATIONS	85
Conclusions.....	85
Addressing Current Climate Variability.....	85
Addressing Transformative Change.....	86
Bank Group-Level Lessons	87

the role of IFC	89
National-Level Lessons	89
Global Public Goods and Adaptation.....	89
Recommendations	90
General Considerations	90
Specific Recommendations	90

Boxes

Box 1-1. Trends and Prospects on Extreme Climatic Events	2
Box 1-2. Where's the Water in this Report?	8
Box 2-1 Productive grants boosted household income and climate resilience in Nicaragua	16
Box 2-3. SFDCS Commitments to Climate Adaptation	21
Box 3-1. Managing Water Resources in the Mekong River Basin	35
Box 3-2. The Karnataka Watershed (Sujala) Project.....	39
Box 3-3. Trees in the Drylands: Sponges or Vampires?	40
Box 3-4. Shortcomings of Disaster Statistics.....	41
Box 3-5. Two Half Drains Are Not as Good as One Whole One	50
Box 4-1. Robust Decision Making and Climate Change.....	70
Box 4-2. Samoa's Dilemma: Coast Road or Inland Road?.....	71
Box 4-3. Trung Son Hydropower: A Practical Approach to Climate Risk.....	75
Box 4-4. Spatial Planning for Biodiversity Conservation in South Africa	78
Box 4-5 From maladaptation to adaptation in the Indian Sundarbans.....	81
Box 5-1. Some Things We Need to Learn to Promote More Effective and Equitable Adaptation.....	88

Tables

Table 1.1. Typology of Adaptation Actions.....	4
Table 1.2. Illustrative Climate and Non-climate Drivers of Adaptation Challenges	6
Table 1.3. Typology of Evaluation Approaches to Adaptation Activities	10
Table 2.1. Climate Risk Identification in FY11 World Bank Projects	18
Table 2.2. Development Policy Operations with Climate Adaptation Content	22
Table 3.1. Major Agricultural Index Insurance Supported by the Bank Group.....	43
Table 4.1. Project Flexibility and Longevity	63
Table 4.2. Information Needs for Anticipatory Adaptation Decisions.....	65
Table 4.3. Scenario and Adaptation Option Methods Used by Surveyed World Bank Studies	69
Table 4.4. Hydropower Project Designs Evaluated by IEG	74

Figures

Figure 2.1. World Bank Projects Mentioning Climate Change Adaptation.....	13
Figure 3.1. The Nilometer: Tracking Five Millennia of Hydrological Variability	32
Figure 3.2. Taxonomy of Disaster Risk Management Efforts	48
Figure 3.3. Status of Weather Stations, 2010-11	57
Figure 4.1. Glacial Retreat in Bolivia	61

CONTENTS

Figure 4.2. Map of Uncertainty in December-February Precipitation Projections at a 20-Year Horizon.....	66
Figure 4.3. Precipitation Projections across Models, 2100	67
Figure 4.4. Spread of Hydrological Predictions for River Basins.....	68

Appendixes

APPENDIX A SUSTAINABLE LAND AND WATER MANAGEMENT PROJECTS.....	95
APPENDIX B ADAPTATION-RELATED INDICATORS AND ACHIEVEMENTS UNDER THE SFDCC	102
APPENDIX C RESULTS INDICATORS.....	108
APPENDIX D DROUGHT MITIGATION PROJECTS, ETHIOPIA AND KENYA	114
APPENDIX E ROADS.....	117
APPENDIX F ANALYTIC WORK ON CLIMATE ADAPTATION	119
APPENDIX G EVALUATION METHODOLOGIES.....	122
APPENDIX H ADDITIONAL EVIDENCE	124
APPENDIX I PROJECT EXAMPLES.....	128
REFERENCES	135
ENDNOTES.....	143

Evaluation Managers

❖ Caroline Heider	Director-General, Evaluation
❖ Kenneth M Chomitz	Task Manager
