

# IDMP relevance for GEO and its Work Programme activities

Florian Franziskakis, Douglas Cripe  
Group on Earth Observations Secretariat

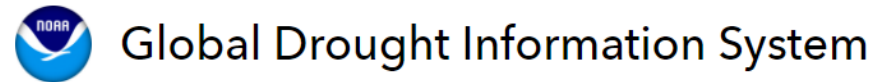

## 2020 – 2022 GEO Work Programme

The GEO Work Programme is the primary instrument used by GEO to facilitate collaboration among its Members, Participating Organizations, GEO Associates, and other partners on activities to realize GEO's Mission and Vision. It comprises **60+ activities** organized around thematic areas.

# Examples

Establishment of drought monitoring programmes at different scales is valuable for GEO

Many areas for collaboration with GEO Work Programme activities in places where drought monitoring programmes are implemented

Not only open data but an open knowledge approach will help uptake and capacity building
