DR in the Colorado River Basin: Partnerships and Patience

2 October 2024, 8:30-10:00

The Colorado River Basin

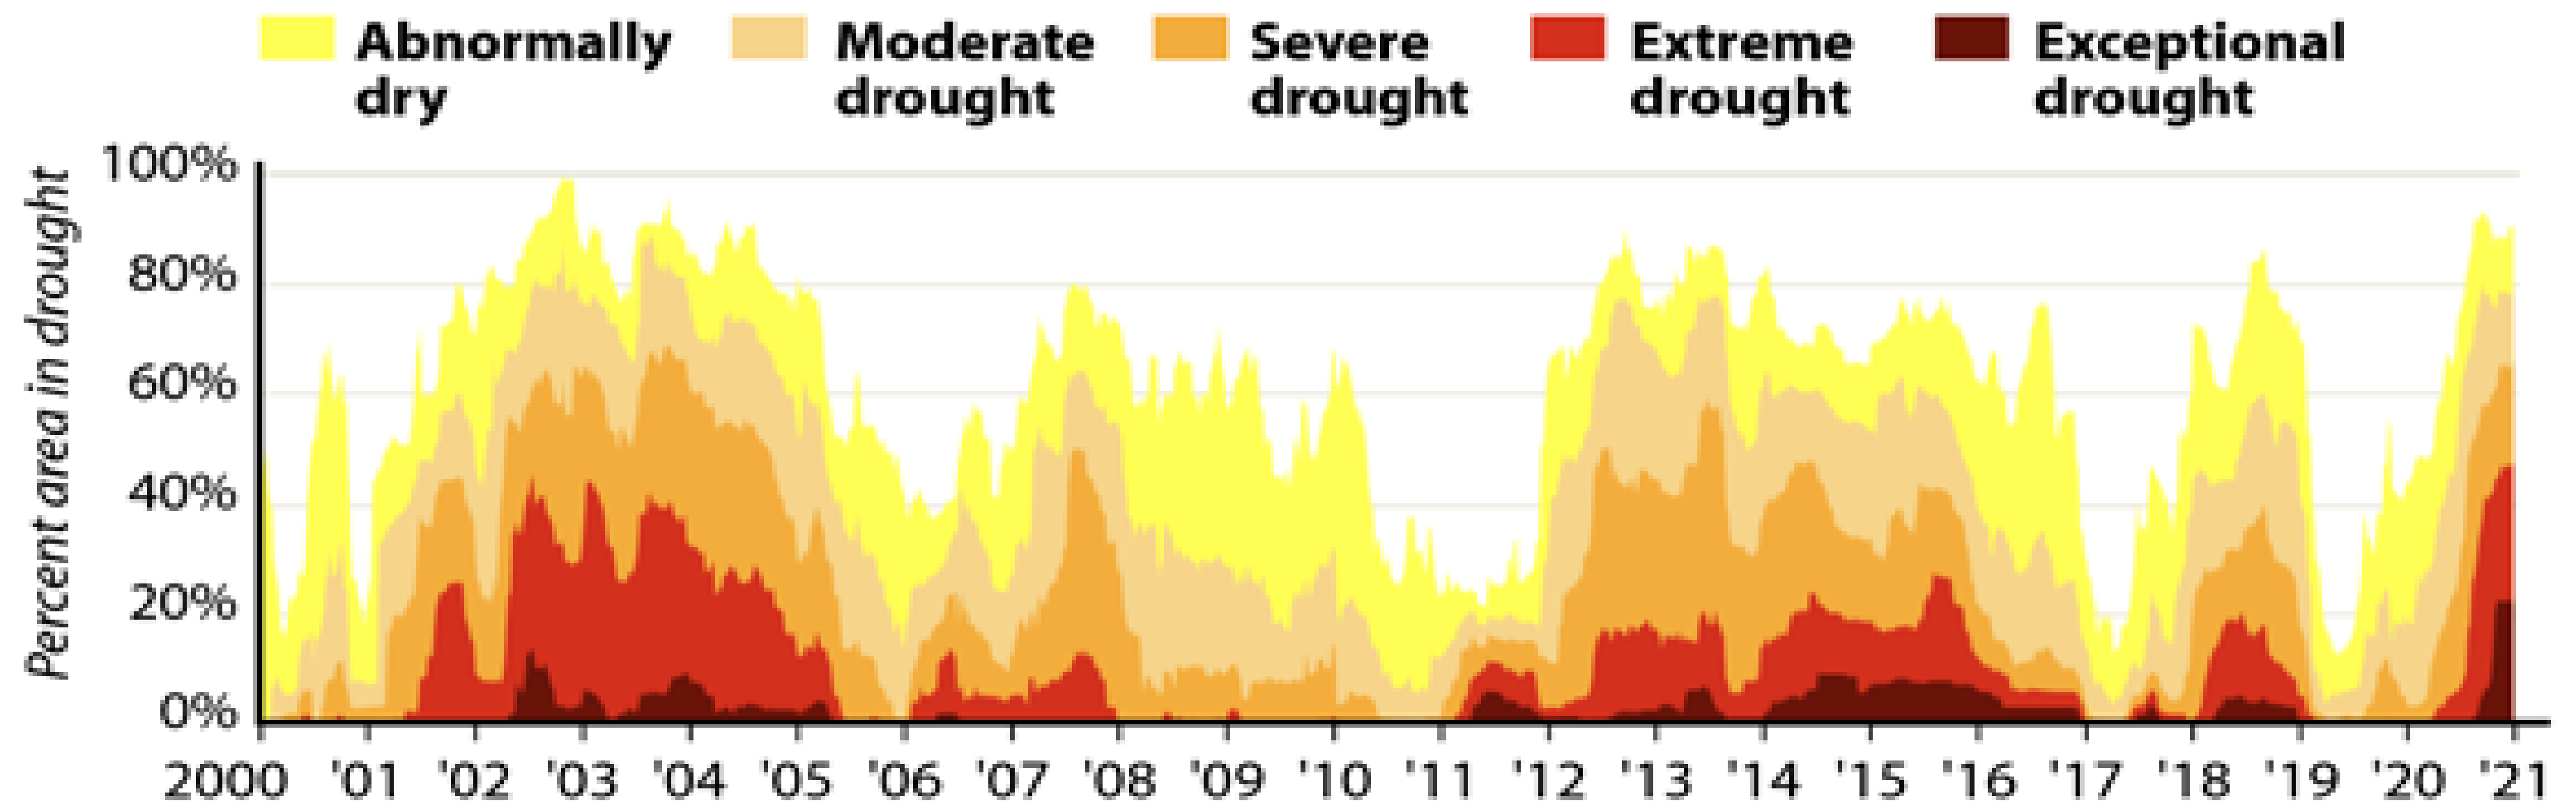

Dry Times Becoming Normal Across the West

As the West heads into the new year, a recent history of drought suggests a troubling future. Experts have started using terms like “megadrought” and “flash drought” to talk about regional climate trends.

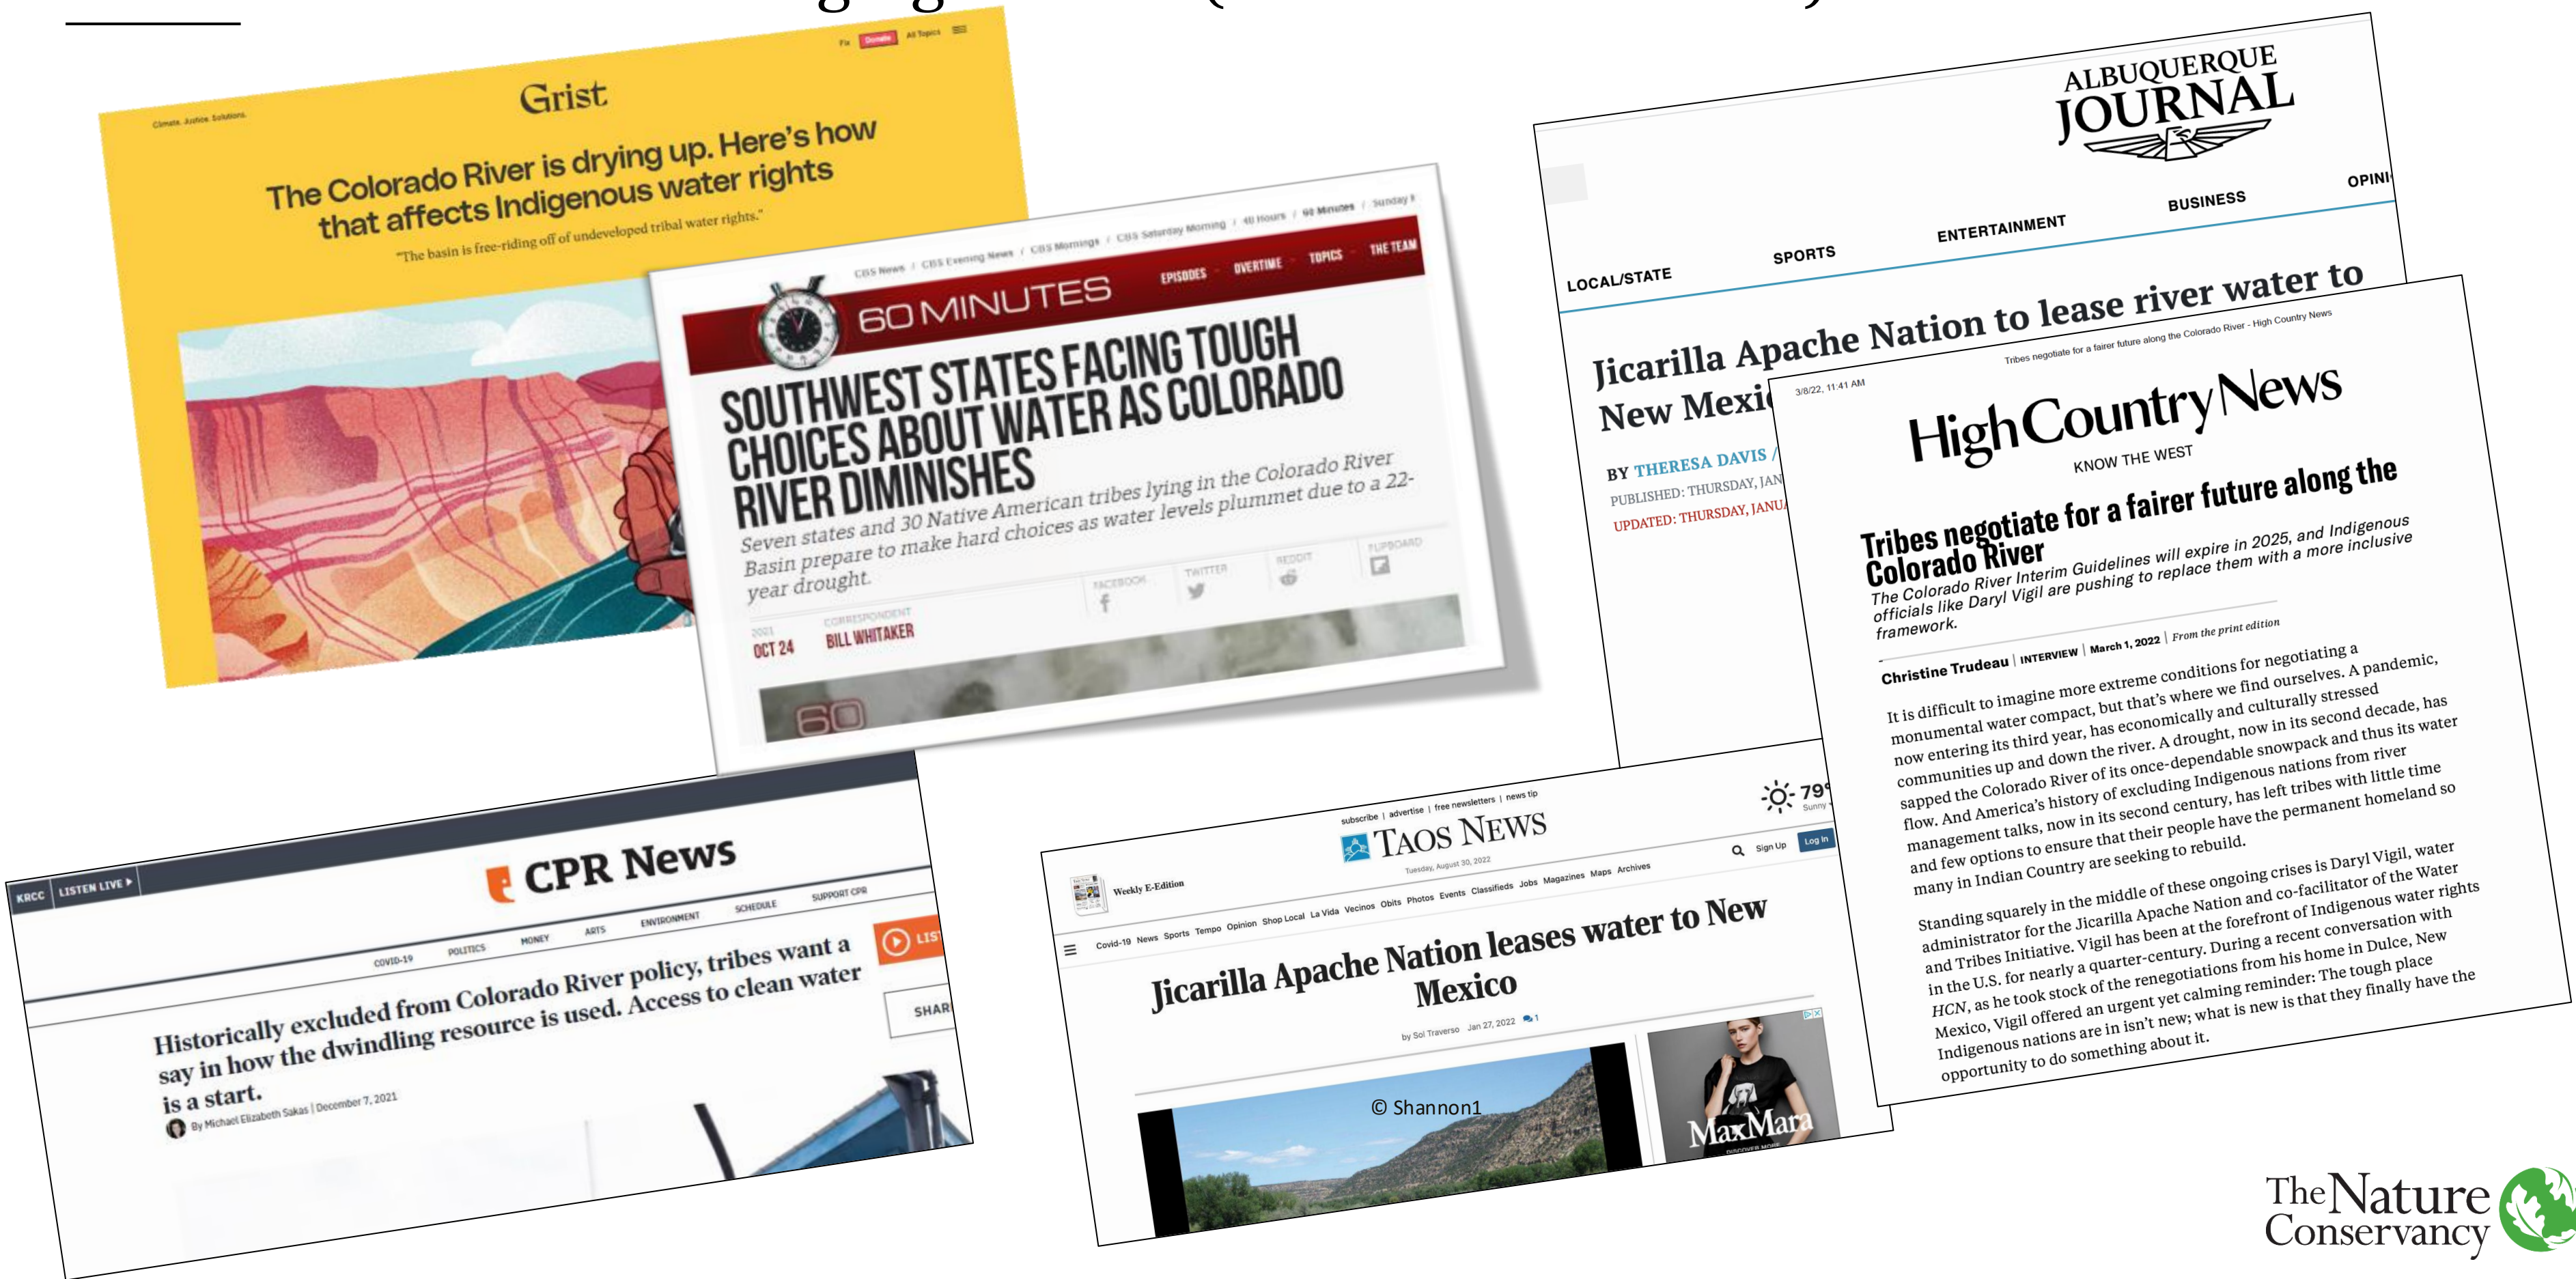

WESTERN U.S. DROUGHT CONDITIONS

Percent area, Jan. 2000-Jan. 2021

Jicarilla Apache Nation/New Mexico Interstate Stream Commission Water Sharing Agreement (the “Win-Win-Win”)
